EDUCATION

PDPM Indian Institute of Information Technology

Bachelor of Technology in Computer Science Engineering

Jabalpur, India

Aug 2020 - Jun 2024

SKILLS SUMMARY

Languages: Java, JavaScript, TypeScript, Python, C++, SQL, GoLang

Frameworks & Libraries: Node.js, React.js, Next.js, TypeScript, REST APIs, GraphQL, Express.js, Microservices, Linux

Databases & Messaging: MySQL, PostgreSQL, MongoDB, Redis, Kafka, RabbitMQ, Aurora, Elasticsearch, LLM APIs (OpenAI, Anthropic/Claude), Vector Databases (Pinecone, FAISS)

Tools & Infrastructure: Git, Docker, Kubernetes, CI/CD, AWS (EC2, S3, RDS, Lambda), GitHub Copilot, Azure DevOps, Agile/Scrum, Secure Coding Practices, Event Driven Architecture

Coursework: Operating Systems, Data Structures & Algorithms, Networking, Object-Oriented Programming, DBMS

EXPERIENCE

Codewinglet Private Limited

Software Development Engineer

Surat, India

Apr 2025 — Present

- Integrated the **AI-EMS module** across backend **microservices** via **WebSocket** streams, using **React Query** for caching reducing redundant API calls and improving response efficiency by **40%** for end users.
- Architected RESTful and GraphQL APIs across platform features using microservices architecture defining service contracts and contributing to technical design and road map for reliability at scale.
- Owned the **Trust Score** feature end-to-end structured **PostgreSQL** schema, built **Kafka** consumers for async processing, and exposed **GraphQL APIs** serving **100,000+** users in production.
- Developed a **real-time tracking system** for a smart waste management platform with **low-latency** API polling, surfacing live data across dashboards with near-zero latency.

Tripta Innovations Pvt. Ltd

Jr. Software Developer

Surat, India

Sep 2024 — Mar 2025

- Replaced a vulnerable verification mechanism with **Cloudflare Turnstile** and reinforced **API access controls** following **secure coding practices** reducing unauthorized traffic by **30%**.
- Migrated a **React** frontend into an existing **PHP** system via a standalone **AWS** backend on **Linux** with **Nginx** routing without downtime or admin panel changes.
- Reduced **API response times by 35%** via **load balancing** and **CDN** improving **high availability** and handling **1,000+** concurrent requests without degradation.

GoToSIOC Technologies

Full Stack Developer — Intern

Remote

Dec 2023 — May 2024

- Optimized backend query performance by **20%** using **MongoDB aggregation pipelines** and designing **REST APIs** to standardize data flow between services and the frontend.
- Boosted UI responsiveness through **Redux** state management and a **Tailwind CSS** revamp, contributing to a **30% increase in user engagement**.

Your Digital Buddies

Frontend Developer - Intern

Remote

Oct 2022 - Dec 2022

- Build reusable React components and responsive layouts using Material UI in collaboration with a cross-functional team, boosting conversion rates by **4%**.

PERSONAL PROJECTS

Sahayata — Doctor Appointment Platform

React.js, Socket.io, Node.js, Express, MongoDB

GitHub

- Engineered a role-based healthcare platform with **RESTful APIs** supporting patients, doctors, and admins enabling appointment booking, verification, and controlled access to platform features.
- Implemented complete appointment life-cycle management with scheduling, status tracking, notifications, and dedicated dashboards for users to manage appointments and platform activities.

Price Tracker — Price Monitoring Platform

Next.js, TypeScript, MongoDB, Web Scraping, Cron Job

GitHub

- Built a product price monitoring platform that tracks price changes over time, stores historical data, and allows users to manage watch lists for multiple products.
- Delivered an automated price tracking pipeline with an alerting system designed for fault tolerance and high availability in a distributed, event-driven architecture.

ACHIEVEMENTS

- Led a **5+** member team to design and deliver an ERP system for IIITDM Jabalpur.
- Achieved **AIR 2214 in CodeKaze**, a national-level competitive programming contest (Sep 2023).
- Solved **1,000+** problems on Leetcode & Codechef, demonstrating a strong hold on Data Structures & Algorithms.
